2008 Dodge Avenger Check Engine Light: Check Engine Light ...

I have a 2008 Dodge Avenger that has a blinking check engine light that is displaying the following error codes P0300 P0301 and P000A. I changed the plugs but the first cylinder is not firing. I unhooked the chord and there was no change to the engine running of four cylinders. What should I do next?

I have a 2008 Dodge Avenger that has a blinking check ...

A flashing check engine light is your Dodge Avenger's way of saying "I have a serious problem, don't ignore me". Most of the time, that serious problem is a misfire. This flashing light should not be ignored. When your engine is misfiring, it is dumping raw fuel into the exhaust.

Dodge Avenger: Flashing Check Engine Light Diagnosis ...

If your Dodge check engine light is flashing, it means the ECU has detected an engine misfire. Do not operate your vehicle for an extended period. Driving when the check engine is flashing can cause damage to the engine and catalytic converter. Ignoring the CEL warning light can cause more problems down the road.

Dodge Check Engine Light On Troubleshooting Guide | YOUCANIC

If the computer detects an issue with the position of these valves it will set off the Check Engine Light to notify the driver of the issue. This can be caused by a stuck intake manifold butterfly
