David Ye's clever BB gun is the bane of apples and fairly easy to make, judging by his great video.. I got bored and decided to make a BB gun using my air compressor. The secret sauce is a one way valve that blocks air from the firing chamber but allows air in the other direction to rapidly propel ammo into the gun.

The GMG is a pneumatically operated (using paintball tanks for compressed air) .22 caliber airgun. Utilizing a bullpup layout to reduce overall length, the GMG fires lead pellets or round balls at very impressive projectile muzzle energies. It operates in semi automatic or fully automatic mode and uses a 50 round capacity removable magazine.

R-152a has a vapor pressure of 63 psi at 70F. So the pressure in those duster cans is normally around 63 psi. A can of R-152a will last eons longer than a can of true compressed air because a can full of liquid R152a expands a vast amount when it changes to a gas. Everyone just needs to have their expectations match the laws of physics.

Best way to dry compressed air is before you compress it. A refrigerant air dryer is simplest nearly maintenance-free, and fool-proof but expensive and you have to get one a size larger if you install it in the cimpressor inlet. For low first cost, I suggest quick change DIY dessicant air dryers on the intake pipeing before the filter.

CASELMAN AIR-POWERED MACHINE GUN. During the period of 1979 - 1990 an American by the name of Jeff Caselman developed a weapon which was, and still is, revolutionary in concept and design.....the worlds first Air Powered Self Sufficient Machine Gun!. As Jeff himself wrote "with gun prohibition perhaps staring us in the face it is nice to know you do not have to be without protection.

Some guns use a spring, some use co2 gas, others use compressed air. PCP airguns use compressed air which is stored in a reservoir on the gun. This differs from other single pump or multi-pump airguns in that there is a large volume of "Pre Charged" air which allows for multiple shots between fills.
