Rocker arm/injector adjustment for BRM PD The rockers weren't placed in their original order after the cam, lifters, bearings and bolts were replaced. I know the injectors would need adjusting because of incorrect placement of the rockers.

### Crackpot idea for PD injector rocker adjustment | VW TDI ...

Hutchy, think of it like this, the unit injector is a syringe with a spring, when the cam turns it pushes down the plunger via a big roller rocker to inject fuel at VERY high pressure, all you're doing is making sure that the plunger in the syringe isn'T hitting the bottom of the syringe body and binding forcing the cam to try and bend the rocker, it really isn't that complicated, you adjust the screw until you can feel the plunger hit the bottom, then you back it off half a turn.
