File Collection  
Manual Anderson

Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.

## Modern

### Compressible

Solution: Using Table A.1 for  $M = 38$  gives  $T_0/T = 289.8$ . So  $T_0 = 289.8 * T =$

$$(289.8) * (270) = 78246$$

K No, I do not believe the calculation of  $T_0$  is accurate because the assumption of a calorically perfect gas is only good up to about  $M = 5$ . The answer is an overestimate of the actual value, which I believe to be about 11500 K but I will have
