Newborn Care Manual

Healthy newborns (age birth to 1 month) and infants (age 1 month to 1 year) need good care to ensure their normal development and continued health. Immediately after the normal delivery of a baby, the doctor or nurse gently clears mucus and other material from the mouth, nose, and throat with a suction bulb.

Initial Care of the Newborn - Merck Manuals Consumer Version

Newborn Care Manual. Now that they've let you take the baby home (yay!), here's what to do to care for him. By The Bump Editors. Updated Mar 2017. Photo: Candice Baker Photography. Cleaning the umbilical cord. During diaper changes, wipe around the area with an alcohol wipe (check with your OB; some think it's better to leave it alone).

Newborn Care Manual - The Bump

Your newborn will depend on you for every aspect of her care. This section provides guidelines for some basic care activities. BATHING For the first year of life, your baby will only need to be

bathed every 2-3 days. Sponge baths are a good way to help you and your baby become accustomed to the new routine.

WHO | Publications on newborn health

During the first days and weeks after birth, you should aim to breast-feed your baby at least 8 times in a 24-hour period. Feed your baby "on demand," that is, whenever the baby wakes up and shows signs of being ready to eat (feeding cues). Most breast-fed babies will eat 12 or more times in 24 hours during the first week of life.
