Earth Policy Institute Plastic Bags - The Earth Images ...

Plastic bags are one of those things that have been slowly working their way into our lives, and not in a constructive way. Plastic takes a long time to degrade, and plastic bags specifically can take up to 1,000 years to decompose in a landfill. Animals, mainly marine life whose natural diet includes jellyfish, are prone to eat plastic bags.

How do plastic bags affect our health? - Sustaining Our World

“Plastic bags don’t biodegrade, they photodegrade – breaking down into smaller and smaller toxic bits. A plastic bag can take between 400 to 1,000 years to break down in the environment. As it breaks down, plastic particles contaminate soil and waterways and enter the food web when animals accidentally ingest them.”
