Network Performance Monitor - SolarWinds

Use SolarWinds SAM's AppInsight applications to access a level of detail and expert knowledge far beyond what a simple template can provide. You can monitor virtually every aspect of the assigned application by getting relevant performance information from the server level, as well as drilling down into the data store layer for performance data.

Monitor with AppInsight applications - SolarWinds

When 2020.2 was released, the SAM team was nice enough to provide us with a set of application templates to monitor core SolarWinds Orion services. I then asked if these templates were "HA-aware" and a few more templates were created for use on the standby node in a pool. However, what we *really*...
